

### 1. LCM of two given numbers

Write a C program to find the LCM of two given numbers.

**Input Format:**

A single line input containing one integer.

**Output Format:**

Print output according to the discription.

**Constraints :**  $1 \leq M, N \leq 103$

**Sample I/O**

**Input:**

12 24

**Output:**

24

### 2. Prime

Write a program to check the given number is Prime or not?

**Input Format:**

A single line input containing one integer.

**Output Format:**

Print output according to the discription.

**Sample I/O:**

**Input 1:**

5

**Output 1:**

Prime

**Input 2:**

6

**Output 2:**

Not Prime

### 3. fibonacci

Write A program to print fibonacci up to given range

**Input Format :**

A single line contains an integer N.

**Output Format :**

Display all the fibonacci series up to given range

**Sample Test Case :**

**input :**

10

**Output :**

0 1 1 2 3 5 8 13 21 34

**Explanation :**

10-->0 1 1 2 3 5 8 13 21 34-->first 10 fibonacci series
